**SecureSys™ 24/7 remote network monitoring.
Brought to you by Structured Data Systems,
a Unisys Value Added Reseller.**

No question, your network is critical to the health of your business. But how can you make sure the network stays healthy? With SecureSys, you'll have the help you need to quickly diagnose and cure minor ailments. Better still, our Predictive Management tools enable you to prevent major health problems *before* they happen.

SecureSys watches the vital signs of your network round-the-clock, every day of the year. Our network people verify that your critical servers and other devices are online and responding. Using advanced network management software, they'll also monitor performance, and alert you ahead of time when problems may be coming.

SecureSys runs on Unisys hardware, so you know it's reliable and secure. Structured Data Systems (SDS) is an experienced Unisys reseller and system integrator, so you can be sure we'll understand your computing needs.

Find out more about SecureSys today. After all, if your network sneezes, your business could get sick.

For more information on SecureSys, visit our web site: [\(supplied URL\)](http://www.(supplied URL))

(Unisys VAR logo and SDS logo at bottom).
